AGML Lab: Week 0
Introduction

Maurice Wenig

Friedrich-Schiller-Universität Jena

15.04.2024

Formalities

- Consultation every Wednesday 4pm-6pm, meet me in my office (Room 3062, just down the hall)
- Room 3037 at the Campus Inselplatz
- new exercise every week
  - discussion in the week after
  - deadline is always Monday 11:59pm
  - submission via Moodle or make a git(hub)-repository and give me access
    eichelb4rt
- exam requirement: achieve 60% of the total points from the exercises
- exam: final project with oral defense
- you can always ask questions through mail
  maurice.wenig@uni-jena.de

Content

accompanying the lecture "Algorithmische Grundlagen des Maschinellen Lernens / Statistische Lerntheorie"

- if you're not taking that lecture yet, it's highly recommended you do (but not necessary)

Course Schedule

- 22.04. Linear Regression
- 29.04. Polynomial Regression
- 06.05. Logistic Regression
- 13.05. Naive Bayes
- 20.05. Feature Maps
- 27.05. Decision Trees
- 03.06. Bagging, Boosting
- 10.06. Kernels
- 17.06. SVM
- 24.06. Stacking
- 01.07. PAC and Quicksort + introduction project
- 08.07. consultation project

Exercise 00

We will use Python / Jupyter Notebooks for the exercises

- exercise 00 is a small introduction to Python (voluntary, will not be graded)
- we recommend Visual Studio Code with the Python and Jupyter Extensions
  - https://code.visualstudio.com/docs/python/python-tutorial
  - https://code.visualstudio.com/docs/datascience/overview
- if you're on Windows, I recommend you install WSL2 Ubuntu
